

**\* TRADITIONAL TRANSPORTATION PRODUCTS:**

Established products for use in highway and bridge construction, or maintenance/preservation, with testing protocols for laboratory and/or field evaluation. For examples of such, please go to: <http://www.ntpep.org/Pages/TechnicalCommittees.aspx>

**\* INNOVATIVE PRODUCT:**

A product that does not fit pre-existing product categories, traditional transportation products, or have any pre-existing testing protocols by which to be evaluated. These products must be market ready (R&D completed) and be applicable for use in highway and bridge construction, or maintenance/preservation.
